PROJECT(S)

SENTIMENT ANALYSIS FOR MICROBLOGS : Python |ML

Problem: It is difficult to analyse the sentiment for microblogs in different situations manually.

- Sentiment Analysis for microblogs used analyse the sentiment of text ,audio, csv files using machine Learning.
- This project is helpful for product reviews, app reviews and content reviews

ONLINE RETAIL SELLING SYSTEM : Python | HTML | CSS

- The project aims to develop a web-based retail application system for an existing shop.
- The system is specifically designed for the Android platform.
- The online retail application seeks to provide customers with the convenience of online shopping and home delivery services.
- By offering this online portal, shops can compete with popular online shopping platforms like Flipkart and eBay.
- The system can be implemented in any local shop or multi-national branded shops with retail outlet chains.
